PROFESSIONAL SUMMARY

- **Full Stack Developer** with practical expertise designing scalable, production-grade web applications across the MERN ecosystem, Next.js, and cloud platforms; integrated advanced AI solutions including Retrieval-Augmented Generation (RAG), LangChain, and vector databases.
- **Advanced Problem Solver** built upon a robust foundation in competitive programming and modern UI/UX design, possessing elite algorithmic skills proven by resolving 700+ technical challenges with a 500+ day continuous coding streak.

EDUCATION

2023 – present B.Tech (IT) – **JSS Academy of Technical Education**, Noida 8.7/10 CGPA

EXPERIENCE

Full Stack & GenAI Developer – *Freelance* Jan 2025 – Present

- Developed and launched 5+ enterprise-grade full-stack web platforms utilizing the MERN framework, Next.js, and Tailwind CSS for responsive SaaS interfaces.
- Orchestrated 3 comprehensive Retrieval-Augmented Generation (RAG) pipelines using LangChain, OpenAI models, and Pinecone; configured secure RESTful APIs and streamlined CI/CD cloud workflows.

PROJECTS

CampusQuery – AI-Powered Campus Assistant

[Live Demo](#)

- Spearheaded a multi-channel AI institutional assistant using GPT-4 and RAG to supply context-aware responses with multilingual voice (ASR/TTS) support across web, WhatsApp, and Telegram.
- Built an administrative dashboard featuring automated document ingestion and human-in-the-loop validation, boosting response precision and slashing manual maintenance efforts by 60%.
- **Tech Stack:** Generative AI, MERN Stack, Pinecone, Azure Blob Storage, GPT-4, LangChain, AI Agents

Kawach – Secure Document Sharing Platform [Live Demo](#)

- Engineered a secure file-sharing platform leveraging the MERN stack and Cloudinary, incorporating one-time QR-code authorization with 60-second auto-expiry to prevent unauthorized redistribution.
- Executed automated post-access data purging mechanisms from cloud storage and databases, ensuring 100% temporary access governance with zero residual data retention.
- **Tech Stack:** React.js, Vite, Node.js, MongoDB, Express.js, Cloudinary, JWT Authentication

TECHNICAL SKILLS

Programming Languages:	C, C++, Python, JavaScript, TypeScript, Java
Frontend Development:	HTML5, CSS3, Tailwind CSS, Bootstrap, React.js, Next.js
Backend Development:	Node.js, Express.js, Django, RESTful APIs, JWT Authentication
Databases:	MongoDB, SQL, NoSQL, Pinecone (Vector Database)
AI and Generative AI:	RAG, LangChain, OpenAI API, GPT-4, AI Agents, Tool Calling, Knowledge Graphs
Cloud & DevOps:	Docker, Azure Blob Storage, Clouinary, Git, GitHub, Vercel, Netlify, Render, CI/CD
Core CS Concepts:	Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, OS, Networks

ACHIEVEMENTS

- **Hackathons:** Semi-Finalist at the Smart India Hackathon (SIH) and clinched 3rd Place at the Convergenx Hackathon (JSS University).
- **Coding Contests:** Secured All India Rank (AIR) 844 in the TCS CodeVita global competition and Runner-Up in the CodeShowdown DSA Contest (BVCOE, Delhi).
- **Competitive Programming:** Mastered dynamic programming, bit manipulation, and core data structures by tackling 700+ complex algorithms in C++, sustaining a 500+ day continuous streak on LeetCode and GeeksforGeeks.
